The performance of textile industry in Pakistan reduced in nine months of financial year 2022-23 due to depression in global demand for textile products. The main reasons for low demand are high inflation, increased borrowing cost and uncertain economic conditions that affected purchasing power of masses globally. The cost of production has increased due to high energy cost and shortage of raw material due to floods in last rainy season. Pakistan economy is also facing rapid currency fluctuations and unprecedented government taxation like super tax which resulted in capacity underutilization and the closure of several small to medium sized industrial units. Only large, vertically integrated and export oriented production facilities were able to resist and sustained in the face of unfavorable circumstances.

Third quarter of the financial year 2022-23 was better as compared to first two quarters and we are confident this trend will continue in the last quarter of financial year 2022-23 as well. The company is focusing on export segment and intends to increase export business and reduce local business gradually. Investment is being made continuously in knitted garment business by installing new plant and machinery and expansion of manufacturing premises. Installation of solar power plant of 510 KW is in progress, in addition to already installed 445 KW solar system, to cope the increasing cost of electricity at towel manufacturing facility.

At the end, the directors extend their gratitude to the employees of the company for their teamwork, commitment, integrity and professionalism.
